

TMC420 End-of-Life

Swap and secure your marking future!

Make the most out of your long-time familiar marker head with our new controller set!

Optional support for pattern conversion and training to learn your new controller and Merlin III software.

The Telesis TMC420 controller is being phased out, with the new and improved TMC470 or TMC520 controller set.

TMC520 Touch-Screen Dot Peen Controller

Benefits of using TMC520 controller

- Create a design and produce a mark in under a minute
- See exactly how the design will look before printing
- Easy to use tools for arc text, graphics, and data matrix
- Contaminant-resistant design and flexible installation
- Software can be customized for unique applications
- Impact-proof touch screen interface
- Virtually unlimited pattern storage
- Panel-mount kits available

Benefits of using TMC470 controller

- Fully contained controller—no PC required
- Easy to use menu design for pattern design
- Ethernet port for TCP/IP communications
- Ethernet IP and PROFINET capable
- Durable membrane keyboard
- Stores up to 400 marking patterns locally
- Panel-mount kits available

TMC470 Fixed-Button Dot Peen Controller

SPECIAL OFFER

Upgrade your outdated TMC420 with large discount!

With the end of support for TMC420 you can replace your old controller at a favorable price with one of our supported TMC 470 or even the TMC520 controllers with touchscreen.

Both controllers are fully compatible with your long-time familiar marking heads.
